Information Systems and Technology

PROFILE

Results-driven software and web developer with over 4 years of experience in designing, implementing, and maintaining dynamic web applications and software solutions. Proficient in a diverse range of programming languages and frameworks, including JavaScript, Python, React, C and C#, and Node.js, with a strong focus on responsive design and user experience. Demonstrated ability to collaborate effectively with cross-functional teams to deliver high-quality projects on time. Committed to continuous learning and professional development, with a track record of adapting to new challenges, like in my current project of trying to get drones send their GPS location and land on Boston Dynamics robotic dog Spot.

EXPERIENCE

Web App Design

Aug 2022 — Present

Created multiple web applications of varying difficulty

Stagehand | I.A.T.S.E. Local 102, Evansville, IN

June 2021 – August 2024
Supervisor: Scott VanMeter | (812) 455-9269

Collaborated with teams to set up and dismantle stage equipment for live events, concerts, and theatrical performances.
Assisted in troubleshooting technical issues under high-pressure situations, meeting tight deadlines.
Contributed to numerous high-profile productions in various venues.

Currently Working On

Creating and implementing python programs that send Boston Dynamics Spot that GPS coordinates of DJI's Tello drone. While also Getting the drone to land on Spot at any time, even while its moving.
